

ImageTrend BILLING BRIDGE®

EMS/Ambulance Claims Made Easy

Finally, a billing solution designed for EMS that connects with electronic patient care reports. ImageTrend Billing Bridge® begins the billing process as data is collected, ensuring faster billing cycles with more timely payments.

Powerful Billing Solution

Billing Bridge offers invoicing, account management and reconciliation with advanced reporting capabilities in a single enterprise solution. Built on the ImageTrend Elite™ platform, ImageTrend Billing Bridge delivers interoperability with other ImageTrend systems, eliminating redundant data entry and shortening reimbursement cycles.

Efficient Billing Process

Billing Bridge provides efficiency, flexibility and consistent accuracy throughout the billing lifecycle. Processes are supported by a robust administrative backend that allows for the creation of multi-faceted business rules to keep up with changing policies and support data management and analysis tools including Report Writer.

Automated, Configurable Operations

The system administrator has the ability to manage processes and promote self-sufficiency for their team. Features such as the Rules Engine, data validation, securities and Report Writer are centrally administered by authorized personnel to offer consistent, easy-to-use workflows that allow for intelligent and automated processing.

Efficient

Import ePCR for billing.

Scalable

System able to grow as needed.

Accurate

Oversee the activity trail.

IMAGETREND BILLING BRIDGE®

Data Repository

The data repository is Microsoft SQL based and designed to support the expanding and dynamic requirements of the community.

Data Entry

A seamless integration to ImageTrend Elite and electronic data entry supports ease of collection and ensures non-redundant entries, while being workflow oriented.

Data Exchange

The Data Port technology uses XML and X12 5010 file format standards to ensure data exchange with a variety of applications, agencies and payors.

Scalability

ImageTrend systems are designed with open, scalable architectures and modular functionality. The scalability lets the systems grow as needs, budgets and hardware capabilities allow, delivering continual progression.

Security

The multi-tiered security module incorporated into this application meets HIPAA guidelines and has been reviewed by HIPAA officers of various organizations with a positive outcome. The reporting and auditing functions of the application's procedures allow for complete safeguarding and immediate notifications of any attempted breaches. This provides for data access only through assigned permissions and ensures that only those intended see their data and can access it for reporting.
