EMERGENCY PREPAREDNESS SOLUTIONS

Staying connected allows you to easily manage day-to-day operations while quickly reacting to an emergency to bring calm to a chaotic situation. Resource Bridge™ gives you situational awareness with access to information, available any time at your fingertips. With solutions ranging from Patient Tracking to notifying the hospital of incoming patients, ImageTrend's emergency preparedness tools help you stay in control.

Maintain Situational Awareness

Tools within Resource Bridge enable you to coordinate multi-agency response, allocate emergency medical care resources, and share information and knowledge during an event.

Centralize Management

Lessen adverse impact and centralize incident command data. Communicate, share information, send alerts, manage resources, and more - all from one complete and secure solution. Additionally, you can easily store and retrieve all safety related documents and education materials to ensure responders are appropriately prepared to safely respond to hazards.

Manage Resources

Whether it be daily operations, mass casualty incidents, a pandemic, evacuation or other event, you need to know what resources are available at any given point. With Resource Bridge, you are able to maintain awareness of available resources at care facilities. With a customizable interface, you are able to track resources such as daily bed use and expansion capabilities of hospitals to handle patients in surge conditions while maintaining continuity of care for non-incident related patients.

Seamless Integration

Seamless integrations allow the emergency responders to use the same tools during a disaster or pandemic that they use every day. Improving the efficiency, accuracy, and timeliness in the data sharing process.

Use the same tools daily and when disaster strikes.

Easily share data with seamless integrations.

Reveal the story of your data with reporting tools.

EMERGENCY PREPAREDNESS SOLUTIONS

Flexibility of Resource Bridge

The flexibility of Resource Bridge allows you to select only the modules needed to complete your puzzle.

» Patient Tracking

An integrated solution that gives situational awareness during a multitude of events, daily response, MCIs and evacuations. Quickly collect information and track each patient from initial contact to final destination.

» Hospital Hub™

Hospital Hub streamlines communications between EMS and hospitals. Hospitals receive alerts for incoming patients, can view ePCRs and close the loop with patient outcomes sent back to EMS. This is especially valuable during a pandemic, so positive test results can be communicated to EMS.

» Inventory Management

Maintain an accurate account of your strategic assets and who is requesting resources. Detailed records account where your inventory is located and help you keep track of key product data, with the ability to attach photos and identify each with unique bar codes.

» Reporting

ImageTrend's powerful reporting database gives agencies the tools to make federal and state reporting requirements easy. From creating performance measures to identifying trends, reporting tools help you discover what your data reveals.
