

IMAGETREND® ELITE CORE™ FOR FIRE

ImageTrend Elite™ Core has the ease of use and power of ImageTrend Elite in a special configuration designed for fire departments without a data administrator.

SIMPLY POWERFUL

Easy Administration

Elite Core is the ideal solution for departments that do not have a dedicated administrator. Preconfigured permission groups and forms take the heavy lifting out of the process. Online education and webinar training make it a breeze to have your crew up and running in virtually no time. Document incidents in NFIRS 5.0 compliant data format.

Report and Analyze

ImageTrend's powerful reporting database gives you the flexibility to quickly and easily create dynamic reports. Use the preconfigured print report or create transactional reports with Report Writer.

Consistent Experience

One solution works on Andoid, iPad or Windows devices for a consistent user experience and IT flexibility.

Your Crew's Readiness

Manage your trainings and certification classes with our Training & Activities module. Pre-built data entry forms make it easy to get up and running so you can document details about the event including when and where it was, who taught it and the list of attendees.

Keep Track of It All

The Inventory & Maintenance module lets you allocate resources and track vehicle maintenance and fleet status.

Faster, Easier Data Entry

Elite is optimized for rapid data entry with tabs easily accessible by thumb from the edge of the screen. Features like the "six pack" simplify selection when six or fewer options are available, and type-ahead search gets users through forms faster.

Get It Done

The checklist feature of Elite Core Fire helps departments ensure each detail or task has been completed. Choose daily or weekly truck checks, or track items like drugs and supplies. Each user can determine if equipment is working or supply counts are correct, and be notified by email if there is an issue.

Also Available for EMS

For fire departments with medical reporting needs, Elite Core for EMS is also available. Cross-trained personnel will find it easy to navigate between the two functions. Available separately from its fire counterpart, Elite Core for EMS supports state reporting requirements and NEMSIS compliant national standards. Offline charting capability ensures continuous documentation even when a reliable internet connection is not available.

ELITE CORE™ FOR FIRE

ImageTrend Help/University

To promote ongoing education and training, ImageTrend provides online education materials for its products as self-guided tutorials to all clients with support agreements.

When accessing ImageTrend University, users can view educational videos, manuals, quick guides and workbooks to facilitate better understanding of the software. These have been very useful as both refresher and initial education materials.

A few key features of the ImageTrend University include:

- Smart navigation
- Full-text and keyword searching
- Filters for search results
- Intuitive, easy-to-use interface
- Links to articles related to what you're viewing

Is Core Right for You?

Elite Core has the essential data collection and reporting tools in a preconfigured package, optimized for fast and easy deployment. For higher-volume departments or those needing additional features such as CQI or in-depth management of data sets and permissions, ImageTrend Elite may be a better choice than Elite Core.

Ask your ImageTrend sales specialist for more information.
