

IMAGETREND®

ENVOY™ FOR STATES

Complete Case Management for Statewide Coroner & Violent Death Cases

Envoy is a web-based case management solution specifically focused on managing coroner and violent death cases. The solution houses all demographic, exam and autopsy data, and allows users to automatically submit data. This comprehensive solution can be provided to all agencies in the state and configured to match your enterprise hierarchy.

NVDRS Reporting & Compliance

ImageTrend Envoy gives coroners, medical examiners, epidemiologists and administrators the power to electronically collect and report on all deaths within their state with a single enterprise solution. Included with Envoy is access which provides a seamless export of required data to the CDC.

Beyond simply collecting records from all agencies in the state, you can ensure the data to submit to the CDC is accurate and complete by mapping coroner case fields to VDRS fields. Additionally, Envoy's validation engine helps ensure the right data fields are being collected, and importance can be emphasized using weights. Envoy eliminates the need to sort through paper records and manually report the data, saving countless hours of work and allowing users to be more efficient and productive.

Key Features

-  Improve workflow and streamline data entry
-  Access electronic coroner records at any point
-  Assign appropriate security permissions
-  Quickly and easily report on all data collected
-  Provide the ability to document offline to all agencies
-  Integrate state toxicology source
-  Integrate with electronic death registry systems

IMAGETREND®

ENVOY™ FOR STATES

Report

Near-real time, ad-hoc reports will exceed your expectations, adding benefit beyond data collection and aggregation. Data needed for annual reports, coroner verdicts, investigation, internal reviews and more can be reported on quickly and easily – without the need to sort through paper records and manually enter data into a spreadsheet. Understand your data at an agency, regional and statewide level, and take advantage of the ability create custom reports to dive into in-depth analysis.

Why will your agencies love Envoy?

-  Ability to create agency-defined questions
-  Offline documentation
-  Add attachments to cases, and preview what's attached instead of downloading each time
-  Utilize pre-defined medical history (ICD-10 codes) and medication lists (RxNorm)
-  Dynamically ensure required data is entered before the case is closed
-  Display fields based on entered data using “smart” technology
-  Capture digital signatures in the field
-  Schedule reports to auto-generate and send to the state
