ImageTrend

RMS Intelligence Platform

ELITE™ FOR FIRE

ImageTrend Elite™ Fire is a complete RMS data platform for fire departments. It has everything you expect and more to conduct inspections, document fire incidents and manage fire operations.

Reporting for Your Fire Data

Configure ad-hoc reports for your NFIRS/ NERIS data with the built-in ImageTrend Report Writer™. Standard reports are already designed for the reports you need related to budgeting, grants, ISO accreditation, training and more.

Fluid, Configurable Forms

Create forms to optimize your department's workflow using Elite's Form Manager. Choose fields and order of display for rapid data entry. Use default answers to save documentation time in routine situations.

Save Time with the Library

User-generated content from your peers in other departments can be shared with the Library. Find forms that others have found successful and share the wealth of knowledge in the ImageTrend community.

Centralized Data Collection Settings

Take in-depth control with centralized management of your fields, their value ranges, validation and mapping for import/ export data exchange. The Data Manager lets you activate or inactivate values and change the labels for any choice that appears in a drop-down menu. Create Plus-One codes to enhance your reporting.

Locations/Occupants/Inspections Module

Expand fire operations capabilities with the Locations/Occupants/ Inspections Module. Record data in this cloud-based system where it is secure and safe with backups. Update and reference records from virtually anywhere with an internet connection.

Offline Inspections

Elite is a cloud-based system that works anywhere with an internet connection. With optional ImageTrend Elite Field Inspections™, a building inspection or preplan can be started and completed offline and submitted when a connection is restored. An encrypted database on the local device keeps the data secure from unauthorized access.

Powerful for States, Flexible for Counties & Cities

Not only is ImageTrend chosen more than any other vendor for statewide fire or EMS data collection; it is also the most flexible for municipal and countywide departments. Enterprise architecture ensures smooth data rollup from the scene of the incident to nationwide reporting systems.

RMS Intelligence Platform
ELITE™ FOR FIRE

Available Investigations Module

This module allows your investigators to document all aspects of a fire-related investigation, including such things as witnesses, evidence grids and weather related information.

Other Capabilities and Modules:

ANALYTICAL

Included:
- At Risk Populations
- ImageTrend Report Writer™
- CQI - Fire

Optional:
- Continuum®
- ImageTrend Visual Informatics™ (VI)
- ImageTrend MARS™ Mapping/Reporting

OPERATIONAL

Included:
- Locations/Occupants/ Inspections
- Hydrants
- Preplanning
- Inventory
- Checklists
- Training and Activities
- Maintenance
- Permits

Optional:
- Fire Investigations
- Elite Field Inspections
- Elite Field

INTEGRATIONS

Included:
- ImageTrend Aware™

Optional:
- CAD
- Staffing/Scheduling
- NFIRS/NERIS/Inspections Billing
- Preplans
