HOW TO SUCCESSFULLY UPGRADE TO NEMSIS V3.5

You're looking for a smooth transition to keep up with National EMS Information System's (NEMSIS) version 3.5 requirements. Only ImageTrend powers 40 statewide EMS systems and partners with each state for compliant reporting with the newest NEMSIS standards. We bring that experience to each agency and department that chooses ImageTrend Elite™.
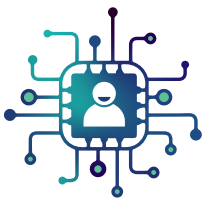

COVER ALL YOUR BASES AND NOT JUST COMPLIANCE

An ePCR designed with flexibility in mind will greatly reduce the frustration of transitioning to NEMSIS V3.5 and future data standards. Apply new datasets to existing run forms with Elite to prevent recreating workflows. Manage multiple datasets in Elite's documentation, validation, reporting and CQI tools versus having to reconfigure tools each update.

BE CONFIDENT YOUR ePCR IS READY

ImageTrend trailblazed NEMSIS V3.5 compliance so you don't have to. Deploy national schematrons in Elite with validation requirements to ensure the right information is documented by crews. Load available state datasets or copy state run forms from the user library to use as is or configure for agency specifics.

USE STREAMLINED TECHNOLOGY THAT WORKS WITH PROVIDERS

A software provider committed to innovation and a positive user experience reduces the technology burden on agencies and departments. ImageTrend provides step-by-step guides, checklists, and videos for each step of the transition to NEMSIS V3.5. Join monthly implementation calls to collaborate with system management and peers going through the same process.

UPGRADE TO NEMSIS V3.5 WITH A COMPLETE SOLUTION

Choose ImageTrend for more than just NEMSIS V3.5 compliance. Elite's configurable forms and built-in ImageTrend Report Writer™ allows your agency or department to capture and report on the data it wants to help manage operations. Schedule your demo of Elite today.
