

CAD INTEGRATIONS

Automate Dispatch Data into the Run Form

Save time by integrating data collected by dispatch. Allow crews more time to focus on the incident at hand when information is electronically pre-populated into the run form.

Import CAD Incident

Unit Notified Date: 12/10/2017 to 12/11/2017

Call Sign: All Unit Number: All Downloaded: Yes No Both

- InterAct
- Motorola
- Northrop Grumman
- Spillman
- SunGard OSSI
- Central Square
- ZOLL
- Hexagon

CAD INTEGRATIONS

Record Times

Timestamp when specific events occur and send that information directly to the patient record. Times that can be automatically populated include:

- Available
- Dispatch
- En Route
- On Scene
- At Patient
- Leave Scene
- Arrive at Destination
- Clear Hospital
- Back in Service

Data Fields

Every agency has their own list of data. We will work with you to ensure the data and fields specific to your agency are the fields that will populate into your run forms.

Data fields may include:

- Last Name
- Gender
- Date of Birth
- Street Address
- Shift
- Role
- Destination Code
- Incident Type
- Agency Number
- Apparatus ID
- Response Mode to Scene
- Insurance Company Name

Getting Started

It is vital to identify the data fields used most often in your agency to ensure those fields are mapped. The ImageTrend CAD team will provide what we call a workbook, containing lists of data fields that can be selected along with tabs to fill out information specific to your agency (e.g. personnel roles, apparatus, etc.) for mapping and configuration.

CAD data can be obtained via a file export, a query or it can be sent directly to the ImageTrend web service.
