

ePCR Intelligence Platform

ELITE™ RESCUE

ImageTrend Elite™ Rescue combines fire RMS capabilities with ePCR in a single platform, making data management even easier for fire departments with emergency medical services. Offering data collection, analysis and reporting all in one, Elite Rescue supports evolving workflows and the identification of improvement opportunities in emergency health care, fire prevention and fire suppression to ultimately improve public health and safety.

-  **Reporting for Your Fire and EMS Data**
Create ad hoc or choose from canned reports for your NFIRS/NERIS or NEMSIS v3.5 data. The built-in ImageTrend Report Writer™ is designed for the reports you need.
-  **Locations/Occupants/Inspections Module**
Expand fire operations capabilities with the Locations/Occupants/ Inspections Module. Record data in this cloud-based system where it is secure and safe with backups. Update and reference records from virtually anywhere with an internet connection.
-  **Fluid, Configurable Forms**
Create forms to optimize your department's workflow using Elite's Form Manager. Choose fields and order of display for rapid data entry. Automatically populate EMS data in fire forms to eliminate manual and duplicate entries.
-  **Offline Documentation and Field Inspections**
Elite is a cloud-based system that works anywhere with an internet connection. With optional ImageTrend Elite Field™ and ImageTrend Elite Field Inspections™, a building inspection or patient encounter can be started and completed offline and submitted when a connection is restored. An encrypted database on the local device keeps the data secure from unauthorized access.
-  **Most Trusted for Data Hosting**
With millions of NEMSIS v3.5 and NFIRS/NERIS records hosted, no other singular system is as trusted as Elite.
-  **Powerful for States, Flexible for Municipalities**
Not only is ImageTrend chosen more than any other vendor for statewide fire or EMS data collection; it is also the most flexible for municipal and countywide departments. Enterprise architecture ensures smooth data rollup from the scene of the incident to nationwide reporting systems.
-  **Save Time with the Library**
User-generated content from your peers in other departments can be shared with the Library. Find forms that others have found successful and share the wealth of knowledge in the ImageTrend community.
-  **Centralized Data Collection Settings**
Take in-depth control with centralized management of your fields, their value ranges, validation and mapping for import/export data exchange.

ePCR Intelligence Platform

ELITE™ RESCUE**Dynamic Power Tools™ and Situation Tools™**

To make short work of repetitive or complex documentation, Dynamic Power Tools and Situation Tools simplify data entry - often to as little as a tap of a button. Based on the provider's initial impression and course of treatment, these configurable tools can be selected for a scenario, such as cardiac arrest, and display common medications or procedures that might be documented.

Capabilities and Modules:**OPERATIONAL****Included:**

- Locations/Occupants/Inspections
- Hydrants
- Preplanning
- Inventory
- Checklists
- Training and Activities
- Maintenance
- Permits

Optional:

- ImageTrend Elite Community Health™
- Fire Investigations
- Elite Field Inspections
- Elite Field

ANALYTICAL**Included:**

- ImageTrend Report Writer™
- CQI-EMS
- CQI-Fire

Optional:

- Continuum®
- ImageTrend Visual Informatics™
- ImageTrend MARS™ Mapping/Reporting

INTEGRATIONS**Included:**

- EKG Monitor
- ImageTrend Aware™

Optional:

- HL7/Hospital
- CAD
- Staffing/Scheduling
- EMS Billing
- NFIRS/Inspections Billing
