

INTEGRATION SOLUTIONS

Your integration needs are unique. Connect with ImageTrend to use integrations and data analytics to create actionable intelligence and eliminate data silos. Our integrations team works with you to fully understand your challenges and prepare a detailed plan for a successful implementation.

EKG Integrations

ImageTrend integrates with Philips, ZOLL and Physio Control cardiac monitors. Based on monitor manufacturer, captured data includes:

- 12-lead analysis, defibrillation
- ETCO2
- Heart rate
- Invasive blood pressure
- Noninvasive blood pressure
- Respiratory rate
- SPO2

CAD Integrations

CAD integrations benefit both fire and EMS agencies, offering accuracy and time-saving solutions our clients use and appreciate each day. ImageTrend integrates with over 150 different CAD vendors and has the experience to ensure a smooth connection.

ADSi / InterAct / Motorola / Northrop Grumman / Spillman
SunGard OSSI / Central Square / ZOLL / Hexagon

Scheduling Integrations

Integrating scheduling data with your CAD vendor and ImageTrend solution can simplify completing run forms in the field by automatically populating the appropriate crew and various other information. Ask us about ImageTrend Slate™, a scheduling and operations management solution that integrates directly with ImageTrend Elite™. ImageTrend also has integrations in place with Aladtec and Workforce Telestaff.

INTEGRATION SOLUTIONS

Billing Integrations

This eliminates the need for redundant data entry, as well as providing cost and time efficiencies and higher revenue recovery. Are you considering a billing solution?

Ask us about our ImageTrend Billing Bridge® solution to learn what efficiencies could be gained through our automated bi-directional data exchange.

Connected Solutions

Connected products become solutions to solve your data challenges and create efficiency. ImageTrend delivers the solutions you need allowing you to focus on your everyday operations. Connected solutions help share information, streamline data flow and maximize data usage.

Stay Aware

ImageTrend Aware™ is a free mobile app designed to connect ImageTrend solutions in a single platform for you to manage your professional and personal life. This easy-to-use app allows you to access information from multiple ImageTrend products, such as Elite, ImageTrend License Management™ and Slate in one integrated solution, even if you work with multiple agencies.

Truly Connected Health Information

ImageTrend Health Information Hub™ (HIH) establishes collaborative data exchanges to facilitate patient-centric care and connect data the way you need it. HIH connects and moves data among EMS, hospitals, mobile integrated health programs, HIEs, physician's offices and billing companies. Through flexible exchange methods, encounters can be sent to hospitals or shared through HIH with other agencies, regardless of which ePCR vendor they use*. Connected data opens the door to new possibilities in integrated healthcare.

*Requires each endpoint to be certified NEMESIS version 3.5 compliant. Special data sharing agreements required. See ImageTrend rep for details.
