RESOURCE BRIDGE[™]

Staying connected allows you to easily manage day-to-day operations while quickly reacting to an emergency to bring calm to a chaotic situation. ImageTrend Resource Bridge™ delivers situational awareness with access to critical information, available any time at your fingertips. With emergency preparedness tools ranging from Patient Tracking to notifying the hospital of incoming patients, Resource Bridge helps you stay in control.

Maintain Situational Awareness

Tools within Resource Bridge enable you to coordinate multi-agency response, allocate emergency medical care resources, and share information and knowledge during an event.

Centralize Management with Command Center, Alert Manager & Document Hub

Lessen adverse impact and centralize incident command data. Communicate, share information, send alerts, manage resources, and more - all from one complete and secure solution. Additionally, you can easily store and retrieve all safety related documents and education materials to ensure responders are appropriately prepared to safely respond to hazards.

Manage Resources with Availability Status

Whether it be daily operations, mass casualty incidents, a pandemic, evacuation or other event, you need to know what resources are available at any given point. Maintain awareness of available resources at care facilities and track resources such as daily bed use and hospital expansion capabilities with configurable interfaces to handle surge conditions, while maintaining continuity of care for non-incident related patients.

RESOURCE BRIDGE[™]

Flexibility of Resource Bridge

The flexibility of Resource Bridge allows you to select only the modules needed to complete your puzzle.

Critical Event Management with Patient Tracking

An integrated solution that delivers situational awareness during a multitude of events, daily response, MCIs and evacuations. Quickly collect information and track each patient from initial contact to final destination.

Reporting

ImageTrend's powerful reporting database gives agencies the tools to make federal and state reporting requirements easy. From creating performance measures to identifying trends, reporting tools help you discover what your data reveals.

(0)

Use the same tools daily and when disaster strikes.

Easily share data with seamless integrations.

ImageTrend

Reveal the story of your data with reporting tools.
