

Pre-Plan Fast, Respond Smarter

VISUAL PRE PLANS

Visual Pre Plans is an image-based fire department pre planning and operations software designed to eliminate all obstacles preventing successful incident mitigation. With Visual Pre Plans, conveniently pre plan via mobile and desktop applications, easily creating, updating and sharing useful pre plans.

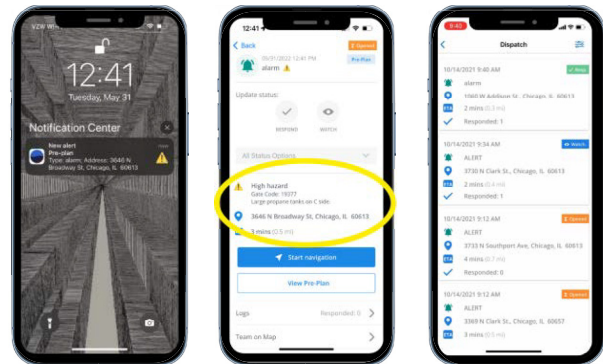

Fast Pre Plan Data Collection

- Create a building pre plan in as little as 5 minutes, quickly meeting your department's pre planning goals.
- Easily add annotated images to provide at a glance, detailed intelligence during incidents.
- Upload hydrant locations and flow rates to automatically add water sources to your pre plans.
- Use your existing building records as a quick start for your pre plans, if desired.

Informed Fire Operations

- Instant on-scene access to pre plans & risk scores for all members via CAD notifications.
- Estimated time of arrival and team on map help ICs coordinate response.
- High hazard notes display with incident location details to indicate dangerous locations.

Easy Program Administration

- Industry's easiest program administration equips admins to keep all pre plans complete and up to date using our dashboard.
- Easily assign pre planning tasks and track completion for a sustainable preparedness program.
