

IMAGETREND'S ALL-IN-ONE PLATFORM

Streamline EMS & Fire Operations with One Connected Solution

Managing multiple disconnected systems wastes time and creates errors.

ImageTrend's unified platform connects every part of your EMS and fire operations, helping your agency work smarter, faster, and with confidence.

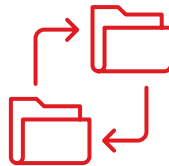

Multiple Systems = Multiple Headaches

Juggling disconnected tools creates inefficiencies, including:

Data silos & fragmented info

Duplicate manual data entry

Delayed insights & reporting headaches

Vendor overload & wasted time

What Makes ImageTrend Different?

- Trusted by **21,000+ agencies** and **46 states** nationwide
- Collecting EMS data for **90% of the U.S. population**
- **7 million+ incidents recorded monthly** with **474 million total records**
- **96.5% Customer Satisfaction Rate**
- HIPAA-compliant, secure platform built for public safety
- Industry-leading implementation and customer success teams

One Unified, Configurable Platform Built for Your Agency

ImageTrend adapts to your unique workflows, eliminating the need to juggle multiple disconnected systems. From dispatch to billing, every step is integrated to save time and reduce errors.

- Integrated workflows from dispatch through billing and reporting
- Streamlined documentation for EMS & fire operations, supporting ePCR & NERIS incident reporting requirements
- Near real-time dashboards for faster, smarter decisions
- Automated billing and credential management
- True ownership and portability of your data

What Our Customers Say

“It all goes back to the all-in-one system. I didn’t want to have to set up interfaces between RMS, ePCR, CAD, and all these things—I wanted just one system. I want our crews to be able to capture the data without it being painful, and I want the system to flow. ImageTrend stuck out. There was no software to install, and everything was consistent.”

- Chris Hughes, System Analyst, Bellingham Fire Department, WA

“ImageTrend has allowed us to progress and be better prepared in the future. With easy-to-use data entry, customization to meet our needs, and the ability to have informative analytics, ImageTrend has been the best solution for our agency.”

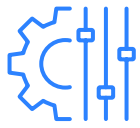

- Rob Morris, Battalion Chief, North Metro Fire Department

“The thing I like most about ImageTrend is that it’s adaptable. Whether I need to build a supplemental question or schedule a daily report, it’s intuitively built. It’s really whatever your imagination can come up with, [ImageTrend] can build it.”

- Jordan Powell, Assistant Chief, Marquette County EMS

How ImageTrend Powers Your Agency's Success

- **Configurable Forms**
Tailor documentation to fit your workflows and improve accuracy.

- **Built-In Data Validation**
Ensure complete, high-quality data capture with automated checks.

- **Near Real-Time Alerts & Dashboards**
Receive immediate updates and clear insights for smarter decisions.

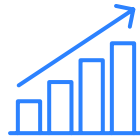

- **Automated Billing & Credential Management**
Streamline invoicing, claims, and license tracking to reduce admin work.

- **Seamless Data Sharing & Interoperability**
Support smooth communication between EMS, hospitals, and partners.

- **Mobile Crew Scheduling & Communication**
Manage shifts and notifications anywhere, keeping teams connected.

- **Continuous Quality Improvement (CQI) Analytics**
Drive better outcomes with targeted evaluations and performance scoring.

- **Operational Tools for Situational Awareness**
Equip your responders with tools to enhance field decision-making.

- **Fire Prevention & Inspection Management**
Access hazard info, pre-plans, and track inspections efficiently.

- **Performance Analytics**
Unlock actionable insights to drive clinical and operational improvements.
