

# STREAMLINE DOCUMENTATION & ENHANCE PUBLIC SAFETY

## Elite™ Fire Investigations

Empower investigators with ImageTrend Elite's Fire Investigations module—designed for comprehensive fire-related documentation, witness statements, evidence, weather details, & more.

### Essential Reporting and Analysis Tools for Fire Investigations

From capturing witness statements to managing evidence and weather-related information, the Fire Investigations module enables investigators to handle every aspect of fire-related incidents accurately and effectively. Configurable online forms ensure accurate reporting, while secure multi-tiered access protects sensitive data.

- Document fire scenes with NFPA 921-compliant tools
- Attach and store images, videos, evidence, & weather details
- Classify data as confidential or public

### Key Features

#### Capture Key Details

Document fire-related investigations with features such as witness statements, evidence, and weather-related data for comprehensive reporting.

#### Ensure Data Quality

Built-in validation rules highlight missing or incorrect entries in real time, helping investigators maintain thorough and accurate reports.

#### Secure Data Access

Multi-tiered permission settings protect sensitive data, allowing investigators to designate attachments as confidential or public as needed.

#### Adapt to Your Needs

Highly configurable forms allow administrators to adapt fields, workflows, and documentation processes for any investigation.

#### Analyze Trends Effectively

Leverage advanced reporting tools like Report Writer to identify patterns, improve fire prevention strategies, and share insights.
