

Reliable, secure data exchange to support efficient billing workflows

AUTO BILLING EXPORTS FOR IMAGETREND ELITE™

ImageTrend Elite™ Auto Billing Exports streamline how incidents move from documentation to downstream billing systems. With configurable, automated export options built directly into Elite, agencies have accurate, validated data delivered securely reducing manual effort, rework, & delays.

Flexible Export Options Built for Elite

Elite Auto Billing Exports are performed via SFTP or Web Service methods, giving agencies the flexibility to align with their billing vendor's technical requirements while maintaining control, visibility, & security.

SFTP Auto Exports

SFTP Auto Exports provide a secure, structured option for agencies and vendors that rely on file-based data exchange.

Key capabilities include:

- Secure SFTP connections using a single port with credential-based access
- Support for both password and SSH key-based authentication
- Ability to restrict users to specific directories and permission levels
- Export processing via a first-in, first-out export queue
- View export status and responses
- Support exporting multiple NEMESIS versions within the same configuration
- Ability to re-trigger exports
- Capable of sending large files attachments and PDF copies of incident report

Web Service Auto Exports

Web Service Auto Exports enable near real-time data transfer using the **NEMESIS v3 API**.

Key capabilities include:

- Secure data transfer through configurable authentication
- Transfer incidents to billing systems using the NEMESIS v3 API in nearly real-time
- Configurable criteria for incident to export
- Data validation using the NEMESIS v3.5 data dictionary
- Visibility into export status and responses
- Support exporting multiple NEMESIS versions within the same configuration
- Ability to re-trigger exports
- Capable of sending large files attachments and PDF copies of incident report

Web Service Auto Exports

Auto Billing Exports help agencies:

- Reduce manual data handling and duplicate work
- Improve billing accuracy with validated, standards-based data
- Ensure secure, dependable delivery of incident records
- Maintain visibility and control over data exchange processes
